

Inherited Cardiovascular Disease A Multidisciplinary Forum

Two Day Event

29th & 30th January 2009

Cardiovascular Genetic Service for Wales

This event has been developed in response to requests for information on the important and rapidly developing field of cardiovascular genetics. It is specifically designed to discuss issues and answer questions relating to genetics and cardiology. The course is aimed at Genetic Counsellors, Cardiology Teams, Echo Technicians, Community Nurses, Practice Nurses, General Practitioners, and others involved or with an interest in this area.

Topics covered include:

- Development of the heart and CHD
- Familial Cardiomyopathies / Marfan Syndrome
- Familial Arrhythmias
- Imaging in Inherited Cardiovascular Disease
- Challenges in Inherited Paediatric Cardiovascular Disease
- Sudden Cardiac Death
 - Patient / Family experience
 - Support Group's perspective
 - Role of the Coroner and Sudden Unexplained Death
 - The Pathologist: The Coroner's Autopsy
- Panel Discussion

CPD approval applied for

This 2-day event will begin with registration from approx 10.00am on the first day and finish on the second day at approx 3.45pm. There will be a drinks reception and a chance for networking at the end of day one, followed by dinner at a local restaurant.
