

*The 6th Course on
“Managing Patients with
Implantable Cardioverter Defibrillators”
31st March – 1st April 2010*

Organisers:

Professor R. Schilling, Dr. S. Sporton and Ms Eleanor McFarlane

The Course on "Managing Patients with ICDs" is a two day course providing participants with a working knowledge of Implantable Cardioverter Defibrillators and the safe management of this patient group. It is aimed at Clinical Physiologists, GPs, Nurses, SpRs and all other health care professionals in this exciting field of medicine.

Registration is limited allowing a high ratio of lecturers to delegates.

The aim is to answer the following questions for practitioners with little or no experience of these devices:

- Who should have a defibrillator?
- What do defibrillators do and how do they work?
- What problems can occur?
- How do I look after a defibrillator patient?

Details of the course and registration forms may be obtained from:
